

# Selfie

## With Strangers

**Functional Specification**

# The Description

- **A platonic meeting app**
  - **Meet new people**
  - **Explore the local area**
- **Match a time and place with a random person**
  - **Answer an ice breaker question together**
  - **Take a selfie**
- **Upload and share your selfies**

# The Use-Cases

- **John – The Transfer Student**
  - Looking for new friends
  - Matches with Billy
  - After meeting up for the selfie, the two find out they have a lot in common and become friends
- **Adam – Partying with Friends**
  - Hanging out with a group of friends
  - Their match turns out to be another group
  - With so many people, the selfie becomes a crazy challenge to get everyone

# The Use-Cases

- **Fred – The Tourist**
  - Visiting New York City
  - Looking for interesting pictures at tourist spots
  - His match leads to a great picture and an even better travel buddy
- **Joe – The writer**
  - Writing an essay at Starbucks
  - Gets a notification for a match nearby
  - Takes a picture and returns with a fresh mind for writing

# The Non-Goals

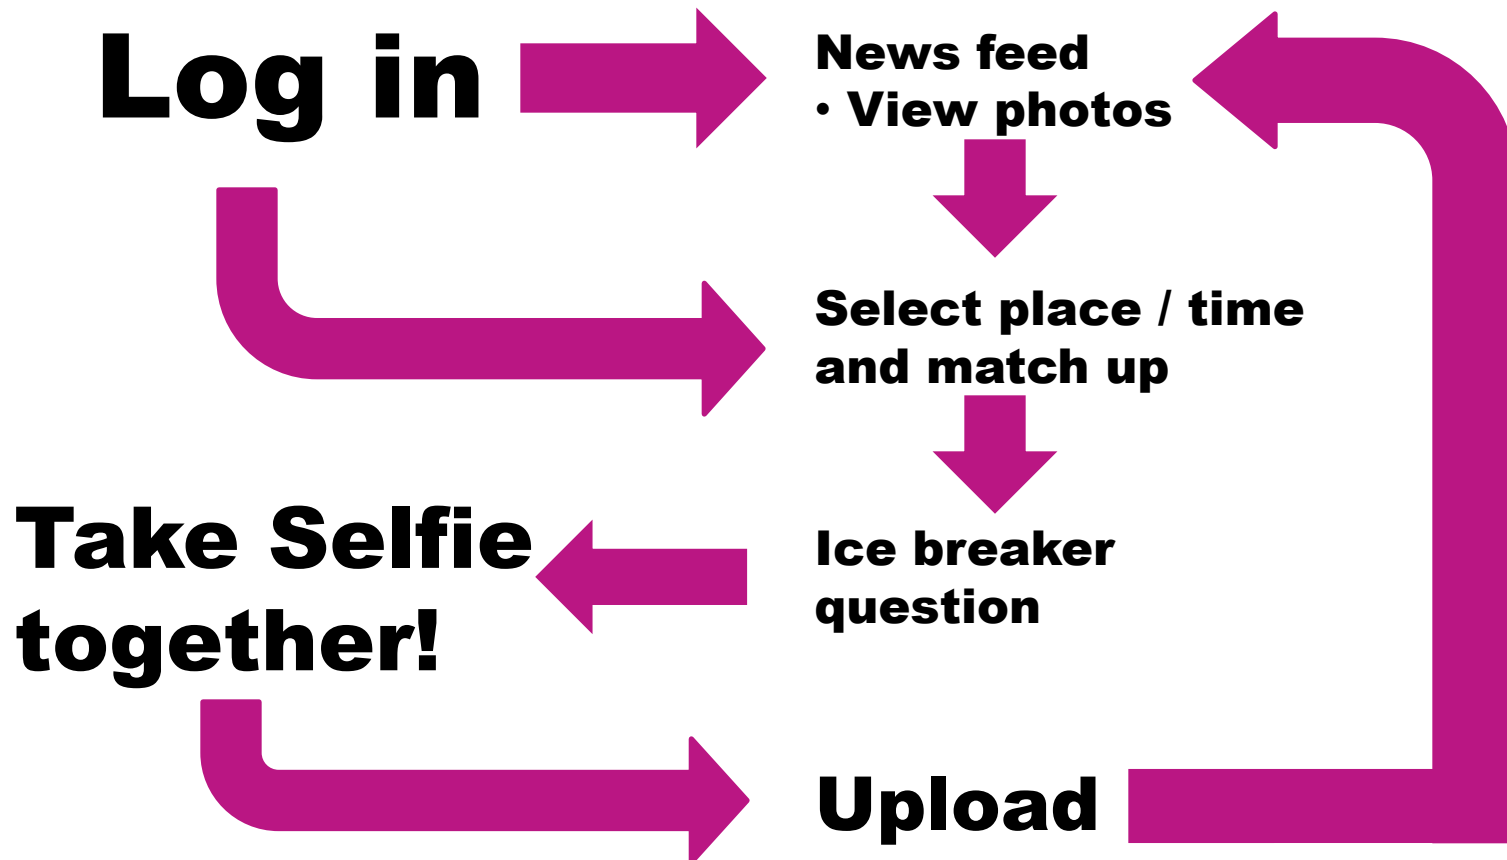

- **Not a dating app**
  - **We're already getting people to meet up, no need to force them to do anything else**

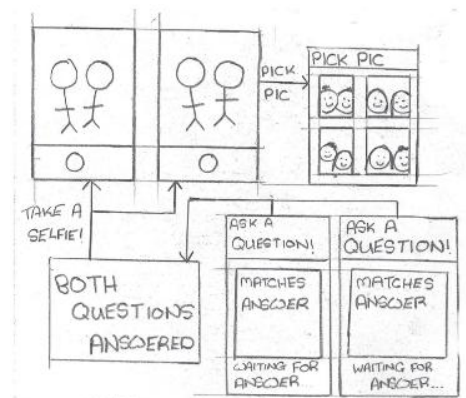

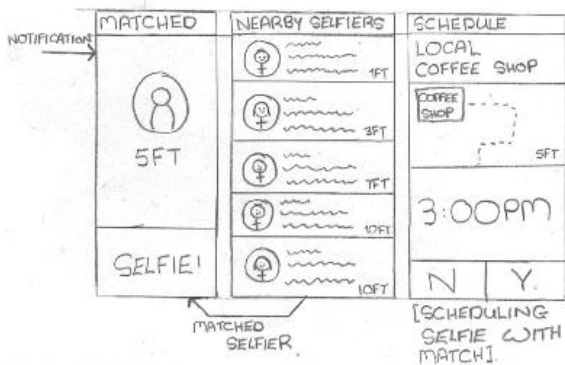

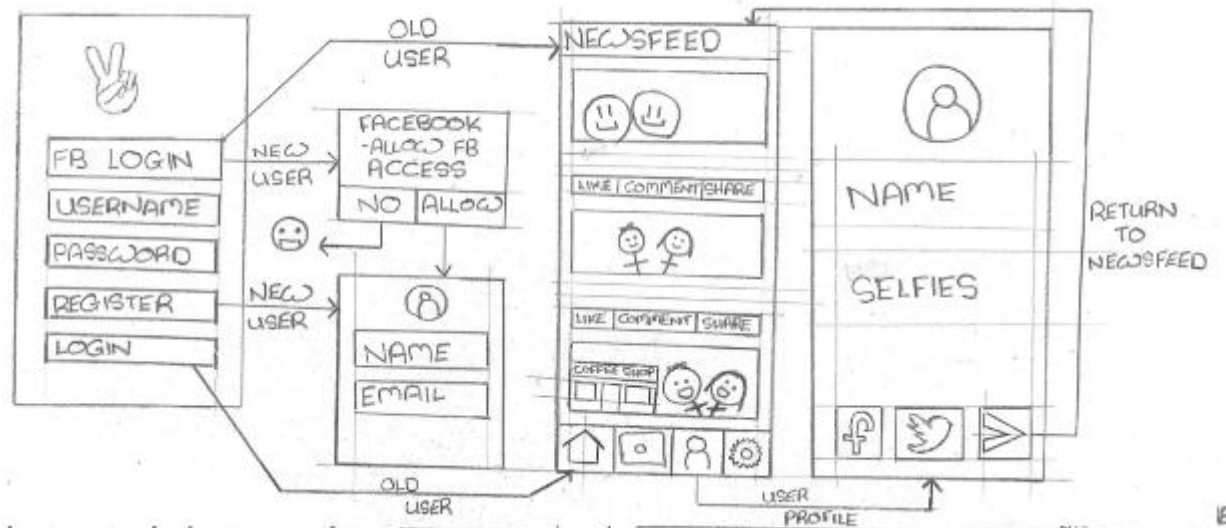

- **Not a way to keep in touch**
  - **There are already other services to keep in touch with people**
  - **We want to stay lightweight and fun**

# The User Flow

# The Wireframes

# Open Issues

- **Points System**
  - **Lose points for no show?**
  - **How to gain points**
- **Security of users**
- **Precision of location data**

**THANK YOU**
